

## AFTER CARE INSTRUCTIONS FOR EYEBROWS

- Please apply aftercare ointment supplied by Elizaveta Neginskaya for 7-10 days after treatment.
- Only apply ointment twice a day with a clean Q-Tip.
- Some swelling, redness, or itching is normal and to be expected DO NOT let eyebrows get dry and brittle.
- Do not pick or rub the area.
- Keep clean and avoid the sun, bodies of water, and direct water pressure, for up to 14 days.
- Brows will oxidize and get darker before they soften in the healing. This is normal!
- Do not wear makeup on brow area until completely healed.
- Wash your hands any time before and after touching your face.
- If you have pets, don't let them sleep next to your face or on bed pillows.
- The first day or two after the procedure you may take Benadryl and apply cold ice packs to reduce swelling if needed.
- You may wash your eyebrows or face after 24 hours using unscented soap only.
- Your Permanent Makeup may look distorted and/or darker when initially applied, this is completely normal. Please remember permanent make up is a process not only a procedure.
